GENERAL DESCRIPTION: SILVER SOAK is an alkaline powder designed for use as a presoak for silverware and silver table service. It also removes tarnish and stains from silver plate and sterling silver utensils. When used as directed, SILVER SOAK will not harm fine and precious silver. It quickly penetrates and saturates soils for their more efficient removal in the dishwashing machine.

SILVER SOAK readily dissolves and produces excellent cleaning results in both hard and soft water. SILVER SOAK's detarnishing procedure removes sulphur type tarnish and stains with an easy application in a soak solution utilizing aluminum foil. SILVER SOAK is highly concentrated and can be significantly diluted for economical use.

PROPERTIES:

Chemical composition Synthetic soil penetrating
and soil suspending agent;
oxide removal agents;
water conditioning agents.

Appearance Yellow powder

Stability 1 Year @ Ambient Temperature

Wetting Ability Excellent

Foaming Moderate

Solubility Complete and Fast

DIRECTIONS FOR USE:

Detarnish silverware at 140°F to 150°F with the ware in contact with aluminum foil or an aluminum container. Electrolytic action takes place, which provides lift and scrubbing action. Leave silverware in the solution for 10 to 15 minutes. (Do not leave silverware in the solution, in contact with aluminum, for longer periods as the aluminates formed may deposit on the ware.) When detarnishing knives, place them in solution in such a way that the blades (all those made of stainless steel) do not contact the aluminum directly.

As a presoak for film removal on stainless steel tableware, use same concentrations and temperatures.

NOTE: Do not use aluminum containers or aluminum foil with stainless steel tableware. Contact with aluminum and stainless steel soaking in detergent solution can cause attack on both metals and damage to the surface of the stainless steel tableware. Also, chlorine type tarnish (caused by bleach or chlorine dishmachine compounds, and grey or black in color) is not removed by SILVER SOAK. Hand polishing with silver creams is appropriate for this job.

HANDLING PRECAUTIONS:

**CAUTION: WARNING
KEEP OUT OF REACH OF CHILDREN**

Alkaline powder. Contact with skin and eyes may cause severe irritation. Harmful if swallowed. Flood with water if splashed in eyes. Flush with water for 15 minutes and consult a physician immediately. If ingested, drink large amounts of milk, milk of magnesia or gelatin, or if these are not available, drink large amounts of water. Do not induce vomiting. Obtain prompt medical attention.

PACKAGING:

4 /8 lb plastic jars - 32 lbs net / 35 lbs gross
24x2 lb boxes/ case- 48 lbs net/ 52 lbs gross
