

SLOSAN

425 Whitehead Avenue
South River, NJ 08882
Phone—732-238-6700
Fax— 732-238-5590

GENERAL DESCRIPTION: SLOSAN is a sodium hypochlorite based sanitizer providing sanitation in dishmachines used in commercial and institutional foodservice operations. SLOSAN is a buffered (high level of free alkali) product which enhances its stability when compared to other chlorine products. Chlorine content aids in stain removal on plastic and china tableware. The chlorine content also provides soil removal in wash cycle. SLOSAN is safe for use on stainless steel, glass, china, porcelain and plastic. May be used for sterling silver, silver plate or other corrodible soft metals.

PROPERTIES:

Chemical composition Buffered Chloramine
Appearance Clear yellow liquid
pH 9.6
pH of 1% solution 8.5
Specific Gravity 1.104 (9.16 lbs./gal)
Solubility Complete and Fast
Available Chlorine 4% (600 ppm in 1% solution)
Stability 180 days @ Ambient Temperature
Safety Safe for use on silver and fine china.

INSTRUCTIONS FOR USE:

LOW TEMPERATURE DISHMACHINE SLOSAN

to be automatically injected during beginning of "final rinse" portion of machine operating cycle. Use approximately 8-16 cc's per gallon of water to achieve a level of approximately 50 to 100 ppm available chlorine as measured with Chlorine Test Kit. Consult local sanitation regulations for specific requirements.

MANUAL SANITIZING RINSE FOR GLASSES, DISHES AND UTENSILS

1. Scrape and pre-flush articles to be washed.
2. Wash with recommended Envirochem products.
3. Rinse with potable water.
4. Sanitize by immersion in LOW TEMP SLOSAN solution using approximately 1 ounce to each 4 gallons of water (100 ppm available chlorine). Immerse all utensils for at least two minutes or for contact time specified by governing sanitation regulations. Test periodically with Chlorine Test Kit. When solution depreciates to 50 ppm available chlorine, discard.
5. Air dry on clean drain board.

HANDLING PRECAUTIONS

**CAUTION: WARNING
KEEP OUT OF REACH OF CHILDREN**

Contains chlorine. Contact with skin and eyes may cause severe irritation. Harmful if swallowed. Flood with water if splashed in eyes. Flush with water for 15 minutes and consult a physician immediately. If ingested, drink large amounts of milk, milk of magnesia or gelatin, or if these are not available, drink large amounts of water.

PACKAGING:

- 4/1 gal. plastic bottles - 37 lbs. net / 40 lbs. gross
- 5 gal plastic pail - 46 lbs. net / 49 lbs. gross
