

Synergy 1 Break

ENVIROCHEM

425 Whitehead Avenue
South River, NJ 08882
Phone—732-238-6700
Fax— 732-238-5590

GENERAL DESCRIPTION:

SYNERGY 1 BREAK is a blend of heavy-duty alkaline builders and sequestering and soil suspending agents. **SYNERGY 1 BREAK** supplies additional power to release even the most difficult soil and grease stains. Once released from the fabric, the soil suspending agents prevent the soil from redepositing on the fabric. **SYNERGY 1 BREAK** may be used alone in a break cycle or in conjunction with **SYNERGY 1 Solid Laundry Detergent** to give stain free results. **SYNERGY 1 BREAK** is specially formulated to be completely compatible with all other Laundry Products. **DO NOT USE ON NATURAL SILK OR WOOL.**

PROPERTIES:

Chemical composition Highly alkaline builders, buffering agents and cloth protectants, water conditioners, soil and grease emulsifiers.

Appearance Off White Solid

pH of 1% solution 12.7

Penetration Immediate

Solubility Complete and Fast

Biodegradable Yes

Rinsing Complete

Foam None

Stability 1 Year @ Ambient Temperature

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

INSTRUCTIONS FOR USE:

SYNERGY 1 BREAK is specially formulated to be used with **SYNERGY 1 Solid Detergents** or in conjunction with **SYNERGY 3 Activated Solid Laundry Bleach** for a personally tailored laundry operation. **SYNERGY 1 BREAK** is formulated to be dispensed directly from the container through an automated injector system into the laundry machine, thereby eliminating handling and possible spillage.

SYNERGY 1 BREAK should not be used where solution contact with aluminum will be made. For normal soils, use 2 to 4 ounces of **SYNERGY 1 BREAK** per hundred pounds of work. While **SYNERGY 1 LAUNDRY BREAK** is completely soluble at all normal water temperatures, optimum soil release will be obtained in hot (1400 to 1600 F) temperatures. Depending on soil and water conditions, a separate break cycle should be from 4 to 8 minutes in length.

HANDLING PRECAUTIONS:

CAUTION: DANGER

KEEP OUT OF REACH OF CHILDREN

Highly alkaline solid. Contact with skin and eyes may cause severe burns. Harmful if swallowed. Flood with water if splashed in eyes. Flush with water for 15 minutes and consult a physician immediately. If ingested, drink large amounts of milk, milk of magnesia or gelatin, or if these are not available, drink large amounts of water. Do not induce vomiting. Obtain prompt medical attention. Consult Material Safety Data Sheet for further information on product acceptability.
